Chronic Care Management

WHAT IS CHRONIC CARE MANAGEMENT?

Chronic Care Management (CCM) is a care coordination service done outside of the regular office visit and is available for Medicare patients with two or more chronic conditions that place the patient at significant risk of death or functional decline.

By providing support between visits, our CCM services provide the opportunity to better coordinate your care and help you stay on track with your healthcare goals. It can also reduce the risk of emergency events.

OUR CARE COACH TEAM

CCM services at Solvera are administered through our Care Coach team. This group of experienced professionals stay in close contact with you and can serve as single point of contact between your provider and your specific healthcare needs.

Once you're enrolled in our Chronic Care Program, you'll be assigned a specific Care Coach. These dedicated Care Coaches will talk with you on a regular basis outside the office, making care coordination easier than ever.
